## Function illustration

### Microprocessor Regulation

Regulates the entire refrigeration process and maintains consistent product viscosity, adjustable through modifying viscosity between level 1 and level 8 on the front panel.

### Safety Protection

Shuts down for self protection when motor overload or compressor overheat occurs due to power surge or abnormal voltage from power supply.

### Mix low alarm

The low liquid alarm will sound when the hopper is lack of ice cream mix.

### Dispensing Counter

The number of ice creams dispensed is displayed on the front panel each time the discharge handle is pressed.

### Standby Mode

The machine automatically enters standby mode after two hours of inactivity and will resumes normal operation after any keys or handles are pressed.

Weight	lbs.	kgs.
